

## PAYMACOTAS

### The best team to make your ideas come true

Since the very beginning, when we started with the management of quality control and technical assistance services, **PAYMACOTAS** has expanded, at both a national and an international scale, due to the incorporation of different engineering companies to our structure.

Since 1970, our highly professional team is at the society's service. The company was set up to respond to our clients' needs and to provide them with the best technological solution in different fields.

In 2013, **GETINSA** became **PAYMACOTAS** main partner in order to boost our company's worldwide presence.

In **PAYMACOTAS** we are attached to our clients, our employees and shareholders; we are also attached to our environment.

We put all our efforts to satisfy our clients, to give them the best quality service. We are devoted to act as a partner who provides solutions, because our unique goal is to have satisfied clients.

## PAYMACOTAS takes part in different phases of key projects:

- We have designed and monitored the construction of more than 5,000 km of highways and conventional roads, as well as 2,000 km of railways.
- We do condition surveying, monitoring and control of the main road networks.
- We calculate and design structures on the high-speed railway line Mecca-Medina.
- We have designed, monitored and directed major underground constructions amongst which it is important to highlight the following: tunnels in the Suez Canal, Le Perthus Tunnel in the Figueres-Perpignan Railway line, Tabladillo Tunnel in the Segovia- Valladolid high-speed railway line, Costa del Sol Rail Corridor, Pajares Tunnel, Line 9 Barcelona Metro, Cadí Tunnel.
- We have projected, monitored and controlled the construction of the AVE High-Speed Railway Network, the AVE accesses to the AVE Atlantic Corridor, AVE Galicia and AVE Basque Corridor, as well as the underground works in Barcelona, Madrid, Malaga, Bilbao and Valencia.
- We have monitored and assessed more than 3,000 dwellings, shopping centres, hospitals, schools and remarkable buildings.
- We have given technical assistance in more than a 100 water purification and treatment systems, dams and storm reservoirs.
- We have coordinated the health and safety in different infrastructure, industrial and building works.
- We do the monitoring in more than 20 incinerators and solid waste processing plants.
- We have taken part in the design, control and monitoring of the main international airports in Spain and its installations, as well as in Chimore International Airport (Bolivia) and Nouakchott International Airport (Mauritania).
- We have checked and monitored the construction work in the ports of Barcelona, Tarragona, Gijon and Roses, amongst others.

## OUR QUALITY:

### QUALITY CERTIFICATIONS AND ACCREDITATIONS

UNE-EN ISO 9001/2008 Certification  
 UNE-EN ISO 14001/2004 Certification  
 OHSAS 18001/2007 Certification

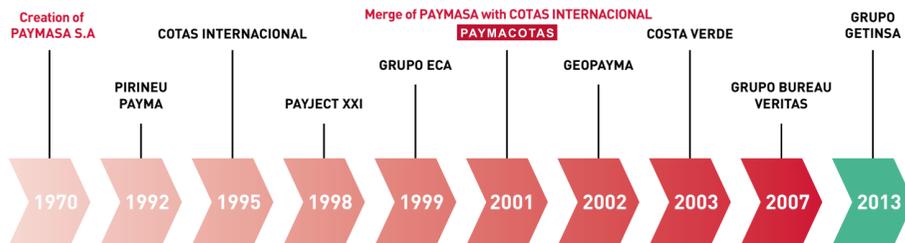

Accreditation by ENAC for testing concrete steel for reinforced concrete, ENAC No. 595/LE1325.

Laboratories accredited by the different competent administrations according to the norm UNE-EN 17025: 2005.

### TESTINGS

- Reinforced concrete
  - Roadways
- Geotechnics, ground and rock mechanical testing
  - Steel structures
- Construction materials

## More than 40 years of growth and success in the Engineering field

## OUR SERVICES

We **DESIGN, PROJECT AND CALCULATE** estructuras, firmes e instalaciones ofreciendo soluciones estructuras, road pavements and installations and we offer building solutions, which assure effectiveness within the whole project.

- Feasibility studies.
- Projects drafting and design.
- Calculation of structures.

We **CONTROL** every construction process and we make sure that all legal or quality contractual requirements, terms and costs are respected.

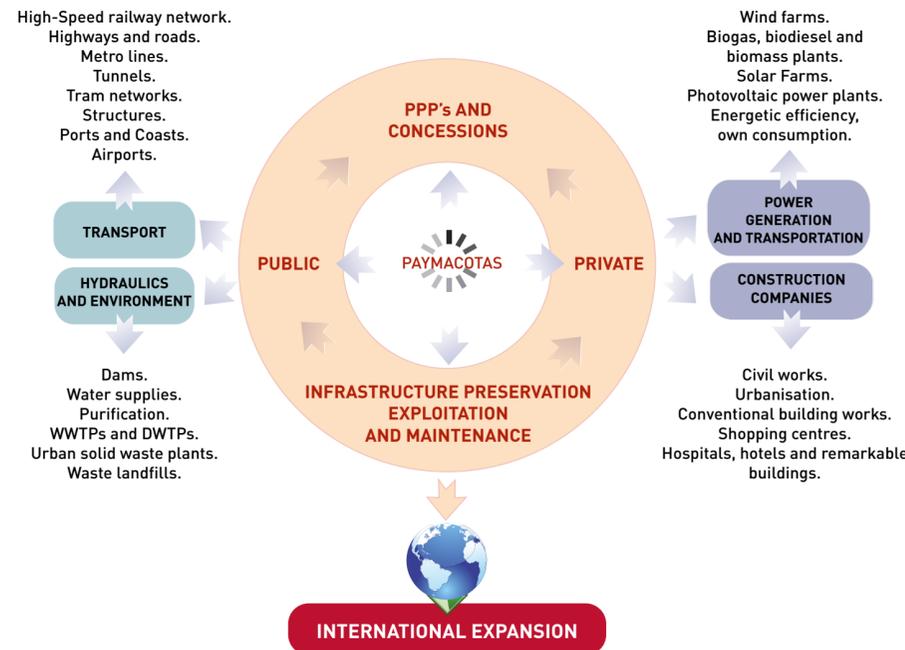

- Works supervision.
- Health & Safety coordination.
- Technical assistance during the design, the construction and the exploitation phases.

We **GIVE ADVICE** to our clients about the different options and their results, in order to provide our clients with the most appropriate results according to their necessities.

We **TEST** the materials used during the construction process, in order to check the compliance with the project established requirements.

We **EVALUATE** the state of infrastructures, installations and buildings.

- Condition surveying on road pavements.
- Assessment of structures.
- Geotechnical condition surveying.
- Inspections and revisions.

## ACTIVITIES:

### Project Management:

We are in charge of feasibility studies, technical studies, initial project draftings and calculation of structures, tendering projects, construction projects and geotechnical engineering of all our activities.

### Concessions management:

We give technical consultancy on the design and construction of concessions, as well as on its exploitation and maintenance.

We analyse PPPs inversion projects as well as concession projects. We do the monitoring of real estate assets.

### Construction works management:

Our aim is to help on the development of Project Management activities, construction site supervision, technical assistance, health & safety coordination, works execution management, technical consultancy, and expropriations management

### Preservation and maintenance:

We are in charge of Facility Management services, energy optimisation, the engineering during preservation, maintenance and exploitation phases of infrastructures and industry. Condition surveying of pavements, maintenance management and evaluation of service quality indicators.

### Engineering and geotechnical condition surveying:

We do field geotechnical surveys, ground and rock mechanical testing, both geological and geotechnical technical assistance, structural and geotechnical condition surveying.

### Construction materials testing laboratories:

Assisting engineers and architects, we do quality controls on the works execution, on installations, assessment surveys of structures and pavements; as well as, quality control of the construction materials through normalised testing.
